

Portable X-ray Scanner System

This device is a light weight ,portable,battery powered x-ray scanning system designed in co-operation with the first responder and EOD teams to meet the need of the field operative. It is light weight and comes with user friendly software that helps operators in understanding the functions and operations in a less time.

Product description

This device is a light weight ,portable,battery powered x-ray scanning system designed in co-operation with the first responder and EOD teams to meet the need of the field operative. It is light weight and comes with user friendly software that helps operators in understanding the functions and operations in a less time.

Applied Scene:

Widespread use of explosives presents immense growing challenges and threats to civilians, law enforcement forces, military and police bomb squads and EOD teams worldwide. The key objective of Bomb Disposal Operators is to accomplish their task as safely as possible. For that reason, EOD equipment, and specifically portable x-ray scanner systems play a crucial role in meeting this objective -providing real time, high quality images of suspect objects, while ensuring the safety of all parties involved.

IED in Bag

Counter Surveillance

The portable X-ray scanner system plays a crucial role in inspecting every objects - such as electronic devices, furniture, walls (concrete, drywall) and even inspecting an entire hotel room. When guarding a public figure, or an embassy, these items as well as innocent looking gifts or mobile phones must be inspected for the slightest alteration in their electronic components which may imply being used as a listening device.

Spy Device in Case

Border Control

The portable X-ray scanner systems are perfect for contraband – drugs or weapons, and IED detection by examination of suspected items across borders and perimeters. It allows the operator to carry the complete system in his car or in a backpack when needed. The inspection of suspected items is quick and simple and provides the highest image quality for on the spot decisions.

Knife & Drug in Bag

Customs

In customs, check point officials must perform a quick, non-intrusive and non-destructive inspection of suspected vehicles and packages with whom they come across on a daily basis. The portable X-ray scanner systems offer an excellent inspection solution for check points that do not have large cargo or vehicle inspection systems or require a complementary solution. It is ideal for contraband inspection such as ammunition, weapons, drugs, jewelry and alcohol.

Tyre Inspection

Features:

Can be assembled rapidly on-site.
Imaging plate using amorphous silicon technology, whose image is very clear.
Can operate with remote control in the rear.
Powerful image enhancement and Analysis tools.
Intuitive interface, Image splicing infinite, simplicity of operation.
User-friendly software.

Integration with EOD Robot
