

Sample of AI Modelling Steps from Our Best Practices

Solution Delivery

The System will be deployed onto production platform (whether on-cloud or on premise depending on customer requirement) and ready to perform the activities.

Cloud-based software and secure data processing

Our platform runs on cloud infrastructure that ensures constant uptime & data security as per international guidelines. No software installation required.

Scalable across multiple worksites

With our platform users can now access data insights across any number of worksites, from *one* to *one-hundred*, on-demand

In-built tools for analytics and measurements

Visualisation of key aspects of the worksite and analytics of worksite performance are built into all our platform workflows.

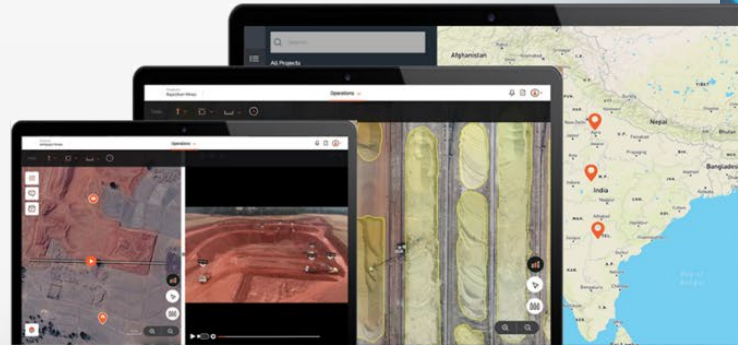

One-click reporting and sharing

Our platform generates reports that can be used for management reviews and performance audits on-demand

Fully Customizable

Access Authorization

Encrypted & Cyber-Secured
