

## Bollard Range

We have a wide range of bollards for residential, commercial and industrial applications - from securing car parks to protection from ram raids. We supply hydraulic, semi-automatic and fixed versions of many of our range. Our bollards have a number of uses which predominately fall into the following use cases:

- Control of road traffic
- Prevention of ram raid type attacks on property
- Protection of property or equipment
- Perimeter security type applications

Most of our bollards are available in standard painted steel or stainless steel. Sizes range from 600mm to 1200mm cylinder height (from the ground) with a cylinder diameter range of 200mm to 355mm. Whether you are looking for a parking bollard, commercial traffic bollard or have a high-security perimeter protection requirement - we have an industry-leading solution for your project.
