

## Scissor Lift

Durable Scissor Structure

Guardrails

## Scissor Lift

### Specification

<b>Features &amp; Advantages</b>	<ol style="list-style-type: none"><li>1. Surface treatment: shot blasting and stoving varnish with anti corrosion function.</li><li>2. High quality pump station makes scissor lift table lifts and fall very stable.</li><li>3. Anti-pinch scissor design; main pin-roll place adopts self-lubricating design which prolong life span.</li><li>4. Heavy duty cylinders with drainage system and check valve to stop the lift table dropping in case of hose burst.</li><li>5. Pressure relief valve prevent overload operation; Flow control valve make descent speed adjustable.</li><li>6. Equipped with aluminum safety sensor under the platform for anti-pinch while dropping.</li><li>7. Up to American standard ANSI/ASME and Europe standard EN1570</li><li>8. Safe clearance between scissor to prevent damages during operation.</li><li>9. Brief structure make it much easier to operate and maintain.</li><li>10. Stop at the per-concerted and accurate location point.</li></ol>
<b>Safety Precautions</b>	<ol style="list-style-type: none"><li>1. Explosion-proof valves: protect hydraulic pipe, anti-hydraulic pipe rupture.</li><li>2. Spillover valve: It can prevent high pressure when the machine moves up. Adjust the pressure.</li><li>3. Emergency decline valve: it can go down when you meet an emergency or the power off.</li><li>4. Overload protection locking device: in case of dangerous overload.</li><li>5. Anti-dropping device: Prevent falling of platform.</li><li>6. Automatic aluminum safety sensor: lift platform will stop automatically when come acrossbarriers.</li></ol>
